

YOUR 3 STEPS TO A SOLID BASE FOR YOUR NONPROFIT

1. READINESS ASSESSMENT

You will check with yourself and others if you are really ready to set up your own nonprofit. You will see more clearly what you need to create your own organization. And you will see what you have in place already! With this step you will know where you stand so that you can decide if you can move forward now.

2. VISION, MISSION, VALUE STATEMENT

You will discuss and define what is the change you want to create in the community you serve. What would the ideal situation look like? How can your nonprofit work towards achieving that vision? What are guiding principles and values for you in this work? This step will help you speak about your plans with others. And it will help you in preparing for registration.

3. STRATEGIC DIRECTIONS

You will look at the pressing needs the community you want to serve faces. How could your nonprofit work on these? You will select one or two directions of work for the next two to three years. An additional strategic direction is developing your nonprofit itself. With your strategic directions in place you can now start planning your work and registration.
